PROFESSIONAL SUMMARY

Product leader with 13+ years of experience architecting and scaling no-code automation platforms, with a track record of translating market opportunity into roadmaps, revenue, and enterprise adoption.

As Head of Product at Sahi Pro, owned the full product lifecycle for a no-code automation platform used by Google, Ferrari, and Lenovo; including architecting an AI-augmented automation capability (Sahi Pro Genaina) that integrates human insight with generative AI. Deep experience managing product-market fit through direct customer engagement, cross-functional execution, and data-driven prioritization across complex enterprise environments.

EXPERIENCE

Head of Product, Sahi Pro, November 2018 – Present

Product Strategy & Platform Ownership

- Owned product vision and roadmap for Sahi Pro, a no-code platform automating workflows across web, mobile, SAP, Java, and Windows applications, translating customer and market needs into a prioritized, technically feasible roadmap.
- Architected Sahi Pro Genaina, an agentic AI augmented automation platform integrating generative AI with human-defined workflow logic, directly translating an emerging market opportunity (agentic, visual-assisted) into a shipped product capability.
- Identified an unaddressed gap in PLM/ECADD workflow automation and architected an AI Assist Add-On using computer vision and machine learning, this single capability grew to ~30% of total revenue and over 70% of new sales in three years, demonstrating product-market fit translated into measurable business outcomes.
- Drove go-to-market alignment across sales, marketing, and customer success, orchestrating and co-developing ~30 pre-sales collateral pieces and completing POCs that directly converted into enterprise sales.

Customer-Led Product Development

- Took direct ownership of customer support as a structured feedback loop, reducing customer-reported issues from 40/month to 2/month by identifying and fixing root-cause workflow and product gaps.
 - Engaged directly with global enterprise customers including Google, Ferrari, Lenovo, Dassault, Konecranes to validate automation concepts, gather feedback, and iterate on the product roadmap.
 - Solved delivery-blocking technical challenges (authentication, proxy, integration, performance issues) that directly unlocked enterprise customers, including enabling Google and Ferrari to be onboarded as a customer.
-

Cross-Functional Execution & Delivery

- Served as the primary liaison between engineering and product, design, QA, marketing, sales, and customer success; driving alignment on a complex, multi-stakeholder roadmap.
- Reduced release cycles from 2.5 years to 4 months, then to weekly releases, by identifying delivery bottlenecks and redesigning release and QA processes; demonstrating sustained, metrics-driven product delivery improvement.
- Worked in the Founder's Office translating high-level vision into strategy, roadmaps, and actionable execution plans across the organization.

IT Analyst, Tata Consultancy Services (TCS), December 2012 – October 2018

Software Development & Platform Ownership

- Developed and maintained FastForward, an SAP AG-certified no-code automation tool, as a global accelerator across enterprise clients including Honeywell, Bose, HasBro, World Bank, and Siemens.
- Developed and demonstrated automation and orchestration capabilities for enterprise applications (SAP CRM, SAP SRM, SAP TM, Salesforce, SuccessFactors, Fiori, Ariba) through customer-facing proof of concepts, directly supporting enterprise sales motions.

RELEVANT SKILLS

- **Product & Platform:** No-Code/Low-Code Platform Strategy, Workflow Automation, AI-Augmented Product Development, Product Roadmapping, Product-Market Fit Management
- **Technical:** Generative AI Integration, Computer Vision & ML-based Automation, Enterprise SaaS Architecture, SAP Ecosystem, API & Integration, Generative AI, LLMs.
- **Programming:** Java, JavaScript, C#, Windows Presentation Framework (WPF)
- **Tools:** AWS, Jenkins, Claude Code, Continue.dev, Docker, Kubernetes, Jira, etc.

EDUCATION, CERTIFICATIONS & TRAINING

- New Product Development, Indian Institute of Management (IIM), Bengaluru | Score: 76.3%
- TCS Leadership Program - Certified to manage teams, equipped to build and lead high-performing project teams
- Bachelor of Engineering, Electronics and Telecommunications, Terna Engineering College, Mumbai University | 2012 | Score: 60.10%

AWARDS & HONORS

- Best Performer 2025, Sahi Pro | Notably, two of the others were members of my team.
 - Code Warrior of Finale, TechGig Code Gladiators 2020 | Awarded for reaching the finals of one of India's largest coding competitions.
 - Outstanding Contribution Award, Tata Consultancy Services | Applauded at the organization level for exceptional performance.
 - Appreciation Award, Tata Consultancy Services | Recognized for fixing critical issues and coordinating effectively with the Gen Re offshore team in Chennai.
-
